One Master Brand. Three Strategic Expressions.

ONE operates as a unified master brand expressed through three distinct industry pillars.

The ONE logo is our signature of non-conformity. While the industry retreats into the safety of generic, right-angled boxes, we have deliberately sliced the corner off the expected. That sharp, beveled edge is a visual indicator of a company that refuses to think inside standard boundaries. It is the mark of an outlier—proving that in every master plan, every partnership, and every square meter we touch, we choose to think outside the box to build landmarks with a soul.

Driving the physical master plan. We possess the local expertise and scale to transform mega-parcels, building the foundational road networks and community infrastructure that unlock future value.

ONE Hospitality:

Curation at the highest global tier. By integrating elite institutional partners like Radisson Red and Ureki Project into our operational design, we craft world-class guest journeys that guarantee premium luxury.

ONE Real Estate:

Pioneering personalized investment pathways. We discard rigid, standard industry sales pitches to build bespoke financial structures that cater individually to the security and agility of global capital.
